ABOUT

I am a 4th-year student at Maltepe University, Department of Architecture (7th Studio).

I prefer to use organic lines and volumes in my designs, based on environmental data, and to incorporate new technologies into my projects, on this path I am advancing toward my goal of combining the art of painting and architecture.

In the projects I have worked on so far, I have gained various experiences in interior design, landscape, and urban architecture. My next goal is to further develop my designs with the parametric modeling I am learning.

ALAN
STUDIO IV / 2022

OFFICE + RESIDENTIAL COMPLEX

The ALAN project is located in Akaretler, one of the busy, luxury and popular locations of Istanbul.

Historical Akaretler row houses

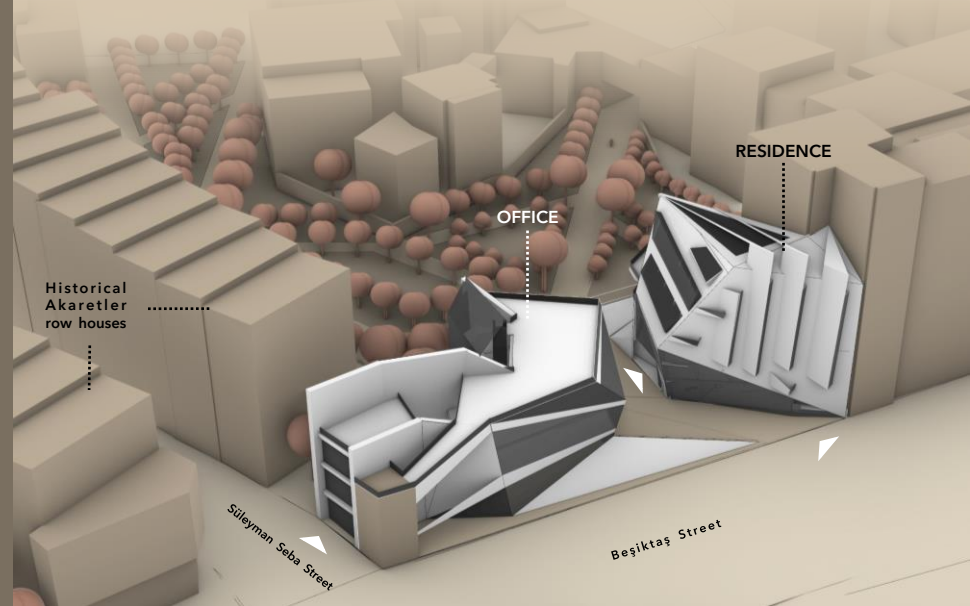

Süleyman Seba Street

Beşiktaş Street

LOCATION PLAN

The main form of the building was determined with the axle taken from the busy streets.

The ALAN project consists of office and residential functions. There are 2 loft apartments with glass ceilings on the top 5th floor.

7 AKIM DIGITAL ART COMPLEX
STUDIO V / 2022

AKIM Digital Art Museum aims to make the rapidly developing digital art feel in 3 dimensions with its extraordinary structure form.

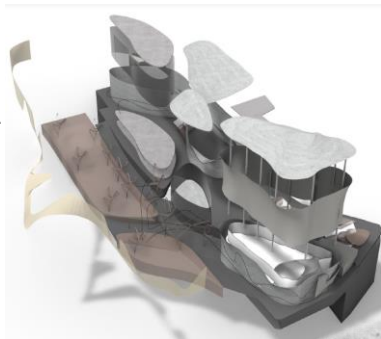

Since the exhibition building and the auditorium should not receive light, thin glass panels that can be closed and opened only in the upper parts of those buildings are used.

8 AKIM DIGITAL ART COMPLEX

3D MODEL WITH RHINO

Kalaycı Street has been lowered to the -3 level in order to make the building appear larger and more fascinating.

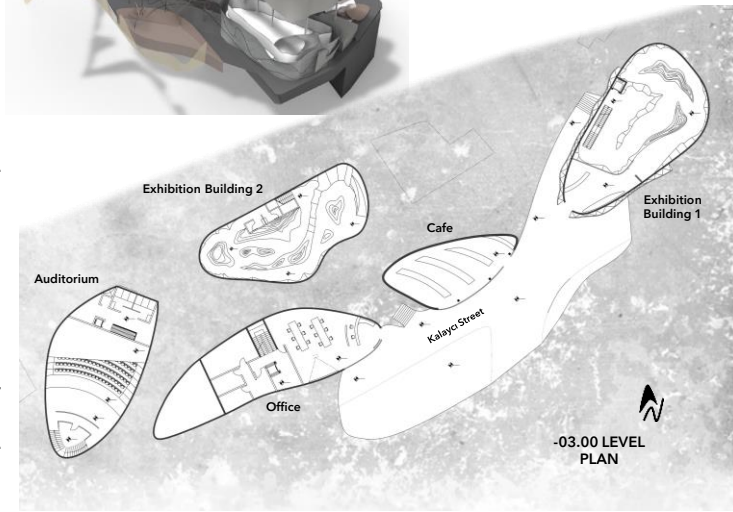

Thus, the street was directed to the main entrance of the building.

2 In the interior design of the exhibition building, walls, ceilings and floors are animated. You will feel the art wherever you s t e p .

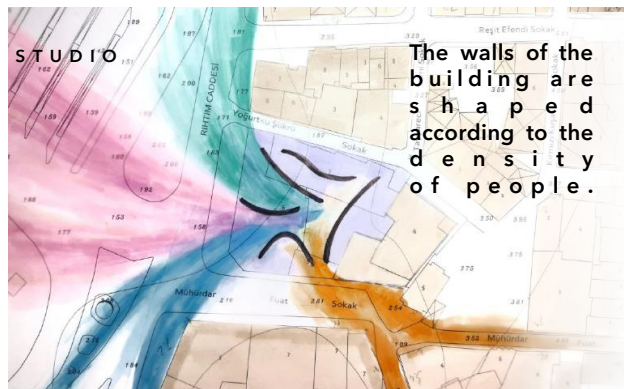

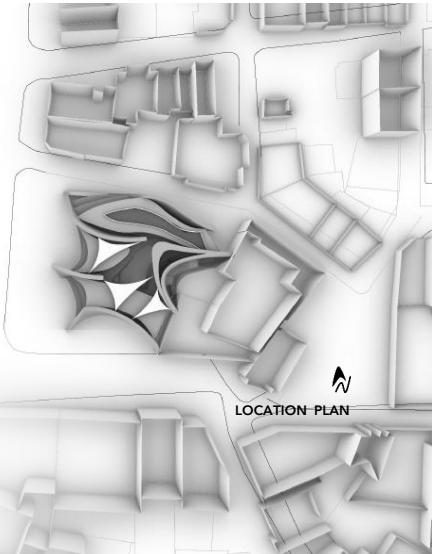

12 ATMOSPHERE

ART STUDIO

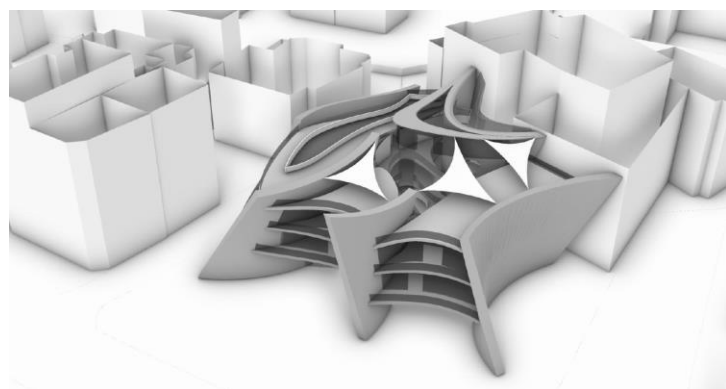

STUDIO III / 2021

Atmosphere Art Studio project is located in the Rihtim area of Kadıköy, where the young population is high and art is followed closely.

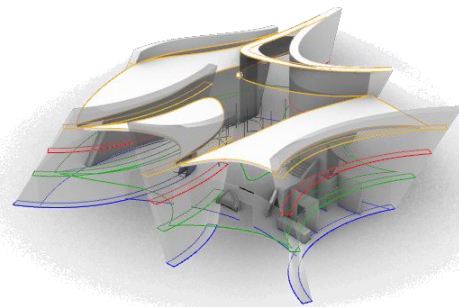

The walls of the building are shaped according to the density of people.

The sculptural structure consists of 5 inclined curtain walls.

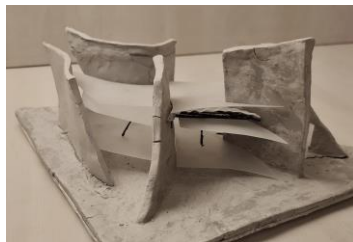

The wall slopes that I determined with the orientations I took from the environment reveal the contradiction of art.

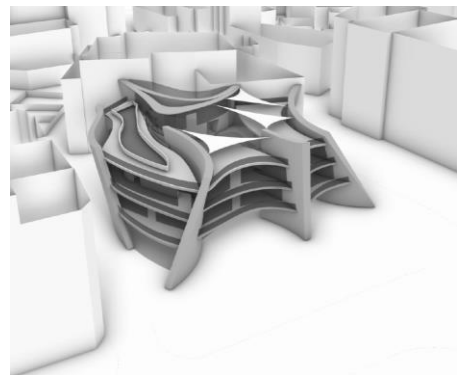

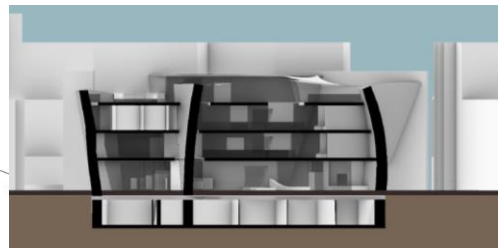

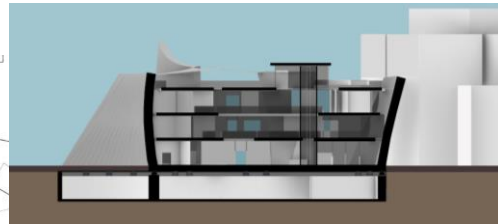

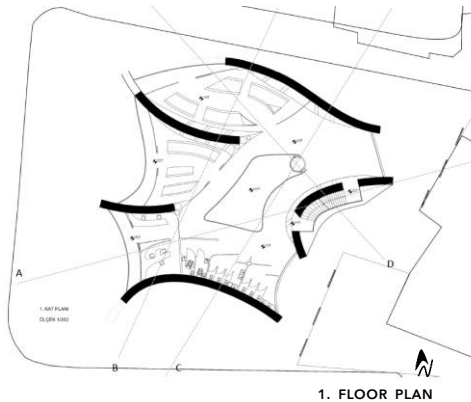

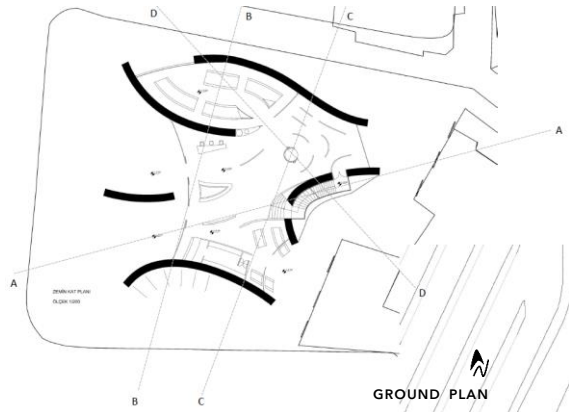

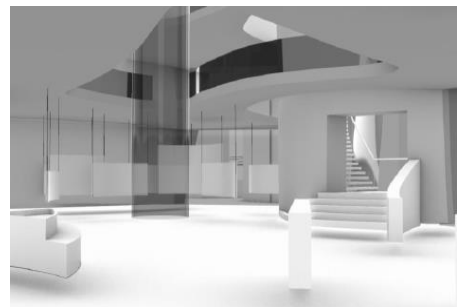

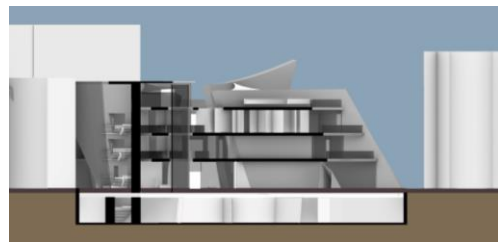

13 ATMOSPHERE ART STUDIO

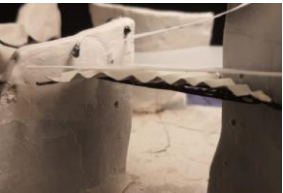

The top bed floor receives light and air from skylights, gallery space, side windows.

The first floor receives light from the gallery space, side windows and the opening of the upper floor.

DIAGRAM

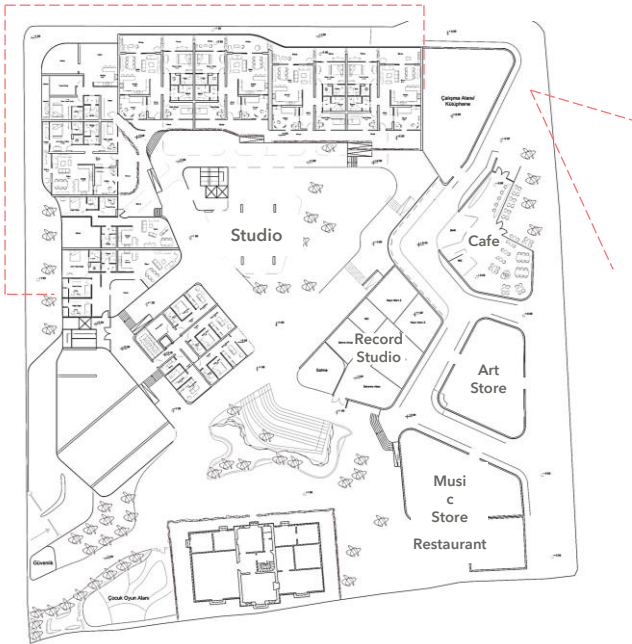

Workshop in every residence except rooms exists. Workshops living in residence the professional needs of artists to a certain extent is intended to meet. Housing in order to increase sociality and productivity partner, with the exception of the Workshops in There are workshops and study areas.

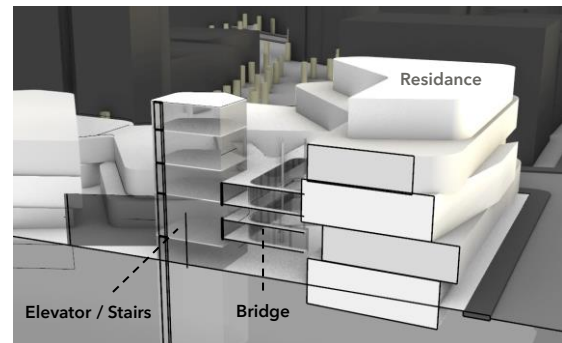

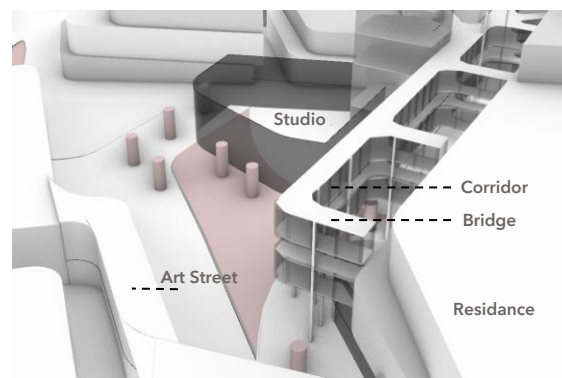

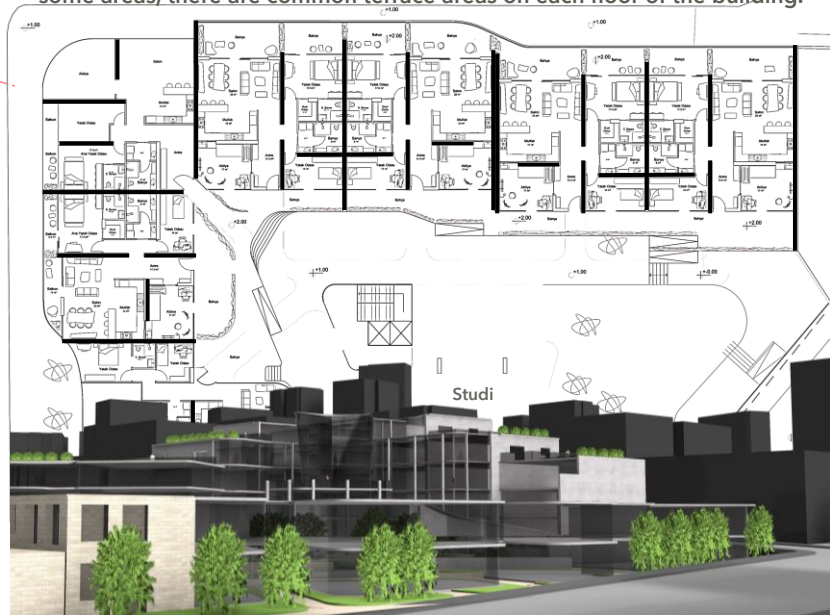

In this period of increasing working from home time people stay at home, inactivity duration has increased tremendously. reduce this problem terrace with easy access from residences gardens, common social areas (cafe, living room areas, walking axis), additional activity areas (sports, cinema etc.) is designed

16 ARTI (PLUS) ARTIST RESIDENCE

The corridor was placed 8m away from the building so that the front rooms could receive daylight. The apartments are entered by bridges from the corridor outside. Since the corridor turns into a viewing terrace in some areas, there are common terrace areas on each floor of the building.

17 DRAWINGS

I've been drawing for a long time. I am interested in all kinds of art. I like to make my project models in clay sculpture style. Recently, together with my teacher, we opened our personal painting exhibition of 50 works. We are continuing the planning for the 2nd painting exhibition.
